

## The Challenge:

Video conferencing frustrations often stem from poor audio quality and difficult connectivity leading to a loss of productivity.

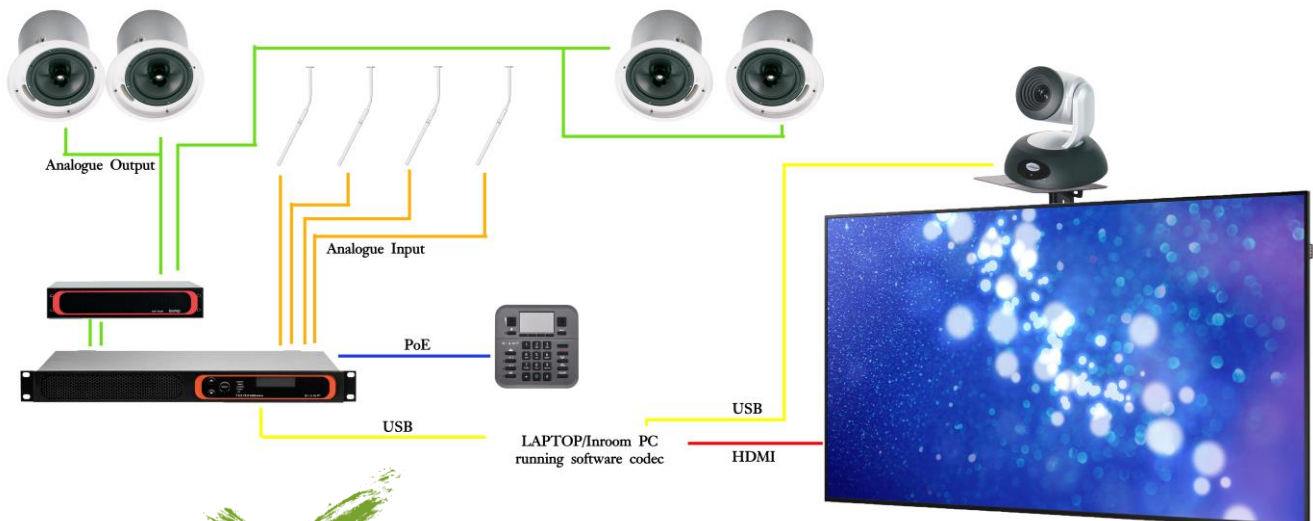

## Our Solution:

At the core of our solution is a biamp DSP using advanced conferencing algorithms to provide superior speech intelligibility to ensure the far end sounds as though they're in the same room. Designed to work with a range of soft codec conferencing packages including Skype, Zoom, WebEx and Hangouts

Conferencing solutions offer businesses of all sizes quantifiable benefits ranging from increases in productivity and morale to savings on travel expenses.

Product		Function
b i a m p	<a href="#">TesiraForte AVB VI</a>	DSP with Acoustic Echo Cancellation (AEC) for clear conferencing audio that eliminates echo and feedback with a VoIP interface
